Education

Divine Word University

Bachelor of Mathematics and Computing Science

2021

Relevant Coursework: Software Engineering, Systems Analysis & Design. Awarded the Hans Erik Lang Award for most outstanding IS/MCS student.

Divine Word University

Postgraduate certificate in Higher Education Teaching & Learning

2022

Gerehu Secondary School

3.8 GPA

2016

Experience

SNS Tech

Port Moresby, NCD

Senior Software Developer

March 2026 – Present

- Led the development and deployment of full-stack web applications using Laravel, PHP, MySQL, JavaScript, HTML, CSS, and WordPress, delivering secure and scalable business solutions.
- Designed and implemented features including role-based access control, Excel/CSV data imports, analytics dashboards, reporting tools, and database management.
- Managed application deployment and infrastructure using Git, GitHub, Composer, SSH, and cPanel, ensuring reliable releases and system performance.
- Collaborated with clients throughout the software development lifecycle, providing technical support, documentation, system maintenance, and ongoing application enhancements.

SNS Tech

Port Moresby, NCD

Web Developer

June 2025 – March 2026

- Coordinated web development projects by liaising with clients and tracking project timelines from initiation to deployment
- Developed and maintained full-stack web solutions using **JavaScript, HTML, CSS, PHP and WordPress** covering both custom development and CMS-based implementations
- Managed server resources, monitoring performance, availability, and system health
- Provided ongoing web support, maintaining site content and performing technical updates, including plugin and system updates

Royal Papua New Guinea Constabulary

Port Moresby, NCD

Programmer

May 2024 – June 2025

- Designed and developed a full-stack task allocation system using Express.js and MySQL, supporting assignment tracking for IT officers
- Implemented RESTful APIs, database schemas, and server-side business logic to ensure reliable data handling and system performance
- Deployed, configured, and maintained the application on a **Linux server**, utilising **Bash scripting** for automation, routine maintenance, and basic operational tasks
- Assisted with system requirements analysis and technical documentation, and conducted user training for Police personnel on newly deployed digital systems such as the electronic occurrence book

Divine Word University

Madang, Madang Province

Tutor

Jan 2021 – Nov 2023

- Tutored undergraduate students in **Mathematics, Computing Science, and IT (Networking)**, delivering both theoretical instruction and hands-on practical sessions
- Taught **Bash scripting**, programming fundamentals, and **Python for data analysis**, covering scripting, automation, and basic analytical workflows
- Delivered instruction in **Calculus and Linear Algebra**, focusing on mathematical theory, problem-solving techniques, and real-world applications
- Designed assessment rubrics and practical evaluations to measure student competency in programming, scripting, and mathematical concepts

PNG Research Outreach Inc.

Port Moresby, NCD

Volunteer Website Developer

2023– Present

- Developed, designed, and deployed the organisation's website on **Hostinger**, managing ongoing updates and content maintenance
- Implemented custom **PHP-based SMTP Mailer** functionality for contact forms and gated downloads, ensuring reliable user communication and file access
- Managed full-stack web functionality, including front-end, back-end, and server-side operations
- Conducted **data analysis and data visualization** to support research initiatives and reporting for the organization
